Step 3

Check whether the one-click password reset plug-in has been installed on the ECS. If it is not, install it.

Note: To ensure that you can reset the passwords of the new ECSs created from a private image, you are advised to install the one-click password reset plug-in (CloudResetPwdAgent) on the ECS used to create the image. For details, see Installing the One-Click Password Reset Plug-In (https://support.huaweicloud.com/intl/en-us/usermanual-ims/ims_01_0408.html).

In this exercise, the ECS is created from a public image. Therefore, the one-click password reset plug-in has been installed on it by default. You do not need to manually install it. You can run the following command to check whether

Send Remote Command

English

Connected (encrypted) to: b19661c2-9f31-4038-a4fa-0889d64ebb4. Log out before you leave.

Local Cursor

Send Ctrl+Alt+Del

Input Commands

DEVICE="eth0"
BOOTPROTO="dhcp"
ONBOOT="yes"
TYPE="Ethernet"
PERSISTENT_DHCLIENT="yes"
